Berlin, Germany • marina.a.kuzminchuk@gmail.com • +4915111081006 • [LinkedIn](#) • [Portfolio](#)

Product Designer with a background in software engineering, specializing in web and mobile applications. I create intuitive, visually appealing interfaces backed by UX research, leveraging both traditional and modern AI-powered tools. I collaborate effectively with developers and have a clear understanding of technical constraints, which enables me to create designs that can be shipped quickly and deliver real value to end users.

EXPERIENCE

IndieKidz GmbH - Occibo, AI-Assisted Children's Book Self-Publishing Platform

Berlin, Germany

UX/UI Designer

2026-Present

- Conducted user research, competitor analysis, and interviews to identify key needs in children's books publishing.
- Designed UX/UI for a web-based SaaS platform that helps authors create, assemble, preview, and self-publish illustrated children's books.
- Designed end-to-end user flows and high-fidelity interfaces for chapters, scenes, spreads, covers, and book preview.
- Created and maintained a design system to ensure visual and interaction consistency across the platform.
- Collaborated with product, development, and QA teams to refine requirements, resolve UX issues, and prepare production-ready designs for developer handoff.
- Use Figma and AI-assisted tools to prototype, explore, and iterate on design solutions.

ArchiTech AI (Kodik) - Pulse Fitness App

Remote

UX/UI Designer

2026

- Transformed an AI-generated fitness app prototype with 30 inconsistent screens into a cohesive product, redesigning workflows for athletes and trainers while aligning the application with product requirements and iOS design standards.
- Designed 60+ high-fidelity mobile screens, including onboarding, workout creation and execution, trainer marketplace, client management, challenges, analytics, and activity tracking.
- Built a scalable design system with reusable components, typography, color styles, design tokens, and UI guidelines following iOS Human Interface Guidelines.
- Collaborated with the product team to refine features, translate requirements into user flows, and prepare production-ready designs for developer handoff.

- Worked on 3 cross-platform mobile applications and 1 web application in the healthcare domain, contributing to 20+ releases.
- Owned feature development end-to-end, from design and implementation to testing and app store release.
- Drove UX/UI decisions, improving layout structure and component sizing for medical datasets, enhancing the usability of interactive human body visualizations, and optimizing the responsiveness of maps integrations.
- Developed an MVP for automated support ticket analysis using AI (ChatGPT & LLaMA), reducing the need for human review by 80%.

EDUCATION

**University of Applied Sciences for Engineering and Economics -
HTW Berlin**

Berlin, Germany

Media Informatics Bachelor

2020 - 2024

Yandex Practicum

Berlin, Germany

UX/UI Design Course

2025 - 2026

SKILLS

- **UX/UI:** User journeys, use cases, user stories, competitor analysis, requirements analysis, wireframing, prototyping, usability, accessibility.
- **Tools:** Figma, Figma Agent, Miro, Tilda, Adobe Photoshop, Canva, Midjourney, Lovable, Claude Code.
- **Software Engineering:** HTML, CSS, JavaScript, SQL, Git.
- **Spoken Languages:** German, English, Russian.
