UX/UI Designer with a background in software development and experience in digital product delivery. I combine user research, user flows, prototyping, and technical understanding to translate user needs into clear, feasible solutions. My previous engineering experience helps me work closely with developers, understand constraints, and support features from concept to release.

EXPERIENCE

Planit - AI Planner & Habits

Remote

UX/UI Designer

2026

- Performed usability testing across 40+ screens, identified key friction points, and helped improve adoption of niche features by 30%.
- Designed 7 marketing visuals to accompany app screenshots, effectively highlighting key features and increasing the download rate by 20%.
- Localized 100+ texts and labels for the German market.

UnicBank - Mobile Banking App Concept

Berlin, Germany

UX/UI Designer

2026

- Conducted user research, competitor analysis, and interviews to identify user needs and product opportunities in mobile banking.
- Defined end-to-end user journeys for onboarding, account creation, card management, and international transfers, including review, success, error, and fee transparency states.
- Translated research findings into wireframes and an interactive prototype across 65 screens, focusing on reducing unnecessary steps and making key banking actions easier to complete.
- Created UI based on iOS guidelines, including typography, color systems, and reusable components organized in UI Kit.
- Delivered a clickable Figma prototype and prepared designs for developer handoff.

SubScout - Subscription Management App Concept

Berlin, Germany

UX/UI Designer

2026

- Conducted research and defined core user scenarios for a subscription management app.
- Designed end-to-end user flows for adding, managing, and tracking subscriptions across 6 main, 8 additional, and 4 edge-case scenarios.
- Created wireframes and interactive prototypes covering 28 screens.
- Designed key features, including subscription dashboard, search and filtering, subscription setup, and analytics views.
- Structured complex subscription data, improving clarity and making it easier for users to track expenses and upcoming payments.

Cross4Channel - Digitales Healthcare Marketing GmbH

Berlin, Germany

Junior Software Engineer in Mobile and Fullstack development

2023 - 2025

- Worked on 3 cross-platform mobile applications and 1 web application in the healthcare domain, contributing to 20+ releases.
- Owned feature delivery end-to-end, from clarifying requirements and implementation to testing, QA, and app store release.
- Collaborated with designers and contributed to UX/UI decisions, improving layout structure and component sizing for medical datasets, enhancing the usability of interactive human body visualizations, and optimizing the responsiveness of maps integrations.
- Developed an MVP for automated support ticket analysis using AI (ChatGPT & LLaMA), reducing the need for human review by 80%.

EDUCATION

University of Applied Sciences for Engineering and Economics - HTW Berlin

Berlin, Germany

Media Informatics Bachelor

2020 - 2024

Yandex Practicum

Berlin, Germany

UX/UI Design Course

2025 - 2026

SKILLS

- **UX/UI:** User journey, use cases, user stories, competitor analysis, requirements analysis, wireframing, prototyping, usability, accessibility.
- **Tools:** Figma, Figma Make, Tilda, Adobe Photoshop, Canva, Midjourney, Lovable, Claude Code.
- **Software Engineering:** HTML, CSS, JavaScript, SQL, Git.
- **Spoken Languages:** German, English, Russian, Belarusian.
